Client Testimonials

MindCraft has helped Discovery Semiconductors, Inc. formulate a long-term software strategy to help transition our products to be in conformance with the IoT paradigm. Discovery Semiconductors is an industry leader in manufacturing ultrafast, high optical power handling InGaAs photodetectors, RF over fiber optical receivers, balanced optical receivers, extended wavelength photodetectors, and several custom products for applications ranging from analog RF links to ultrafast digital communications.

Abhay Joshi
President & CEO, Discovery Semiconductors, Inc.

MindCraft has been our technology partner since 2014, providing offshore services for technical infrastructure and software development. As we have grown over the years, we have been pleased how MindCraft has been there with us every step of the way.
Frequentz is the leader in Traceability Technology for Life Sciences, Food/Seafood and CPG. Our products help Customers create transparency and gain insights about their supply chain. MindCraft has provided System and Database Administration, product documentation and software development.
We've always been happy with the MindCraft staff: they have always shown dedication, commitment and integrity in their work.

Byron S. Lee
Chief Technical Officer, Frequentz

Client Testimonials

We enable global financial services firms to provide a customized digital advisory platform (Robo-advisory) to their wealth advisers and clients. MindCraft fulfilled our need for a reliable and trustworthy technology partner. They have provided us a great team of technology experts that has not only helped develop and enhance our product, but also assist us in implementing it for our customers, which are large financial services organizations.

For Invessence, MindCraft is a one-stop shop that provides offshore services for our mobility, web/portal development, UI/ UX and Integration requirements. What I admire most about them, is that they have been available at all times and are willing to go the extra mile to get the job done. Their domain knowledge is an added advantage. With a deep knowledge base of MindCraft team, we have a great confidence in delivering future projects and support required by our clients with great efficiency.

Jigar Vyas
Founder & CEO - Invessence, Inc.

The team at MindCraft has always gone the extra mile to ensure that everything is delivered on time and is done right - the first time. They develop rapid application development tools and reporting platforms for us. From the start, the team has been focused on the key aspects of the deliverables and have remained committed to our timelines. We have had very few issues, but when we do, they are always resolved quickly and professionally. The Harrier Group currently focuses on the development of web-based, data-warehousing reporting and other custom applications for the financial services industry. The deep technical knowledge, extensive experience and passion for work that the MindCraft team exhibits enable us to focus on what we do best.
